- Sam's Attic
- Laptop from 2019
- Downtown LA 2019(Year Sam's father dead.
- Sam's father's Office
- Milky way.edu (In the milky way)

| Context

# Exposition

The story starts with Sam finishing High school and needing to determine a plan for his future, and trying to find a way to use his intelligence.

Sam is always in the attic because that's where his father kept most of his research, that's where he finds a laptop with all of his father's memories that he connects to a VR headset and re-lives them.

Sam cares about Covid because it was ultimately what took his father, who died from researching it before he could find a cure

# Rising Action

After being  
taken into the  
memory scape  
of his father  
Sam hops  
through his  
father's past

**START**

Sam learns about  
everything his father went  
through while trying to  
cure covid in its early  
stages

**BEGINNING**

Sam learns that his father  
made the absolute  
sacrifice for his research

**FIN**

# Climax

- Sam finds out that his father died from injecting himself with the virus, but he was not able to find enough descriptions in time
- Sam does not find enough description of the symptoms ether. He decided to injects the virus to himself to diagnose symptoms with more precision.
- Sam finds the medallion that contains private documents and a clue attached. This is the missing part that Sam needed in order to lead him to the cure.

# Resolution and Reward

- Sam figures out the cure in time to cure himself.
- Because of his efforts Milkyway.edu gives him a scholarship to study with them and work on their school board.
- Sam gets to leave LA and become well known for his work

# Object Conception
